

PLASAN

Plasan is a global leading provider of mission-ready armored vehicle solutions featuring integrated, add-on and smart armor components, hulls and kits as well as advanced vehicle command, control and management systems. In addition to armor solutions, Plasan's extensive experience in composite materials enables lightweight solutions with heavyweight protection.

Plasan solutions are all developed by teams with a real combat experience. Our end-to-end capability includes design, development, simulation, testing, production and integration, all under a single roof. Plasan has designed more than 150 armored hulls and delivered more than 30,000 armored protection solutions to leading OEMs and are used by armed forces worldwide in the most hostile combat.
